

Jabber 12.6 Quick Reference

Anatomy of the Jabber Hub Window

1. User status / Presence
2. Menu
3. Search or call bar
4. Contacts
5. Chats
6. Recent Calls
7. Meetings
8. Voice messages
9. Support
10. Custom contact groups
11. Phone controls

Login in to Jabber

1. Double click the Jabber icon on your desktop.
2. Your City of Toronto User ID will be pre-populated. Enter your network password (the one you use to log into your computer everyday) and click Sign In.

Note: A security prompt may be displayed once or twice asking you to accept a certificate. This only occurs upon first log in. Please click Accept. The Jabber team is currently working to resolve this issue.

Customize Jabber for You

Access your options and preferences to customize how Jabber works for you.

1. From the Jabber hub window, click Menu (2) then Options.
2. Select any tab in the Options window to customize your choices.

Presence & Custom Status Messages

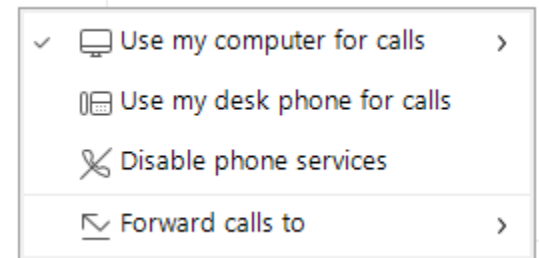

Presence indicates your availability and readiness to communicate.

- You can create up to three custom status messages for each available state (i.e. Available/Green, Away/Yellow, Do Not Disturb/Red).
Note: any red status will mute all phone calls.
- Insert your cursor in the Presence field (1) and enter your new status message.

Voice Messages

The Voice Messages tab let you access, play and manage your voice messages. You will see alerts on the hub window when you miss calls or receive new voice messages.

Phone Settings and Forwarding Calls

You can tell Jabber to send calls to your computer. Click on Phone controls (11), go to Use my computer for calls then place a checkmark next to Use my computer for calls.

You can also tell Jabber to Forward your calls to either voicemail or another phone number.

Make Calls

To call people, you can:

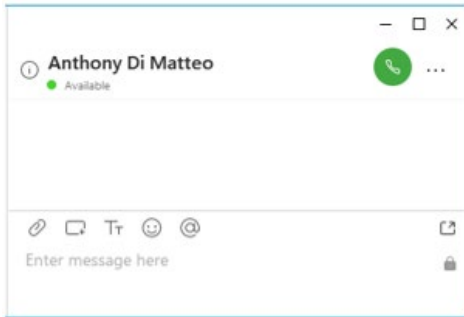

1. Enter the phone number in the Search or Call bar.
2. Hover over their name in your Contacts list.
3. Select the Call icon in a chat window with a contact

IMPORTANT: Jabber must not be used to call 911 or to initiate calls for emergency services.

Jabber 12.6 Quick Reference

Chat Options

To begin a chat hover over a contact's name and click on the chat button.

In a chat session you can:

- Send a file
- Send a screen capture
- Edit the font size and color
- Insert an emotion
- Mention a user
- Show the chat in a new window

Collaborate with Contacts

When chatting with a contact, you can hover over the ellipsis on the top right of the chat window and use controls to:

- Start a phone call
- Add participant to your Contacts
- Schedule meeting
- Share your screen
- Open roster to add participants to create a group chat

IMPORTANT: You should not use chats or voicemails within Jabber to communicate or transmit personal or confidential information.

Sharing your Screen

To share your screen:

1. While chatting with a contact click on the Share screen button.
2. Once your chat partner accepts your screen sharing request your entire screen will be shared.

Click on the Stop sharing button, located at the top of your screen, to end the session.

Collaborate with Groups

You can work with people in your custom groups to apply an action to everyone in it.

1. Right-click over the banner of your custom group name.
2. Select an action from the menu, such as Alert When Available, Start Group Chat, or Send Broadcast Message

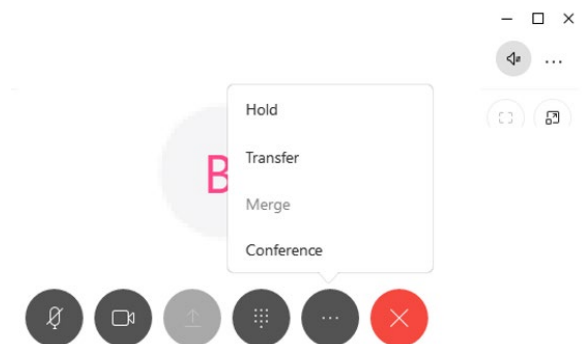

IMPORTANT: If an instant message or voice message created in Jabber documents business decisions, activities, or policies of the City, then it would be considered a business record and you have a duty to document / archive that information using other means such as in an email or Word document. [Learn more about your duty to document.](#)

IMPORTANT: An Instant Message or Voice Message is considered a transitory record if it is used for casual communication and does not document business decisions, activities, or policies of the City. [Learn more about transitory records.](#)

Call Controls

When on a call, you are able to:

- Enter full screen
- Call in a new window
- Mute your audio
- Add video to your call (Requires a webcam)
- Share screen
- Open a keypad to enter digits
- Access the following additional controls under the ellipsis button (...):
 - Hold calls
 - Transfer calls
 - Merge calls
 - Create conference calls

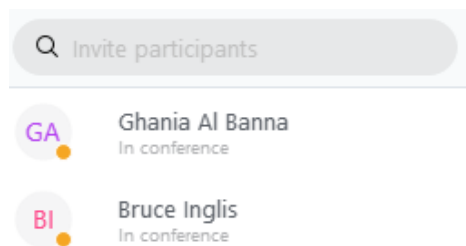

Jabber 12.6 Quick Reference

Conference Calling

1. On the Contacts tab hold down the CTRL key while selecting the contacts who will be part of the call.
2. Click on the Start a phone call button next to one of the selected contacts to begin the conference call.

If you have an ongoing call with one contact and would like to convert to a conference call click on the ellipsis button then Conference. In the conference call window use the Invite participants search field to add more contacts to the call.

Add New Contacts

To add people to your Contacts:

1. Type the person's name or phone number in the Search or Call bar, hover over their name and click on the gray + sign to add to your contacts.
2. Select which group to add the new contact to (or click on New group to create a new group) and select OK.

Locations

You can set up Jabber to show what location you're working from.

1. From the Jabber hub window, click on Menu then Options.
2. On the Locations tab you can manage your locations or turn this feature off completely.

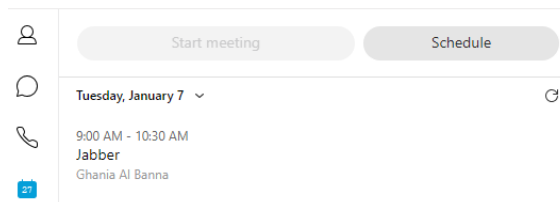

Automatic Startup

By default Jabber has been set up to automatically start when you turn on your computer. If you prefer to disable this behavior.

- From the Jabber hub window, click Menu then Options.
- On the General tab clear the checkmark next to Start Cisco Jabber when my computer starts.

Outlook Calendar Integration

See your Outlook calendar right from Jabber.

- The Meetings tab in Jabber will display all Outlook meetings and appointments for the current day.
- Use the drop down arrow next to the current date to specify a different date.

- Click on Schedule to set a meeting invite and open the Outlook calendar item.
- Click on Start meeting to join the meeting

Using your headset

When first plugging in your headset allow your computer a few minutes to complete set up.

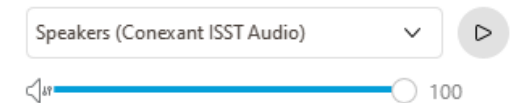

From the Jabber hub window, click Menu then Options.

On the Audio tab set the speaker to the Plantronics headset and click the Play button to ensure sound is going to the headset.

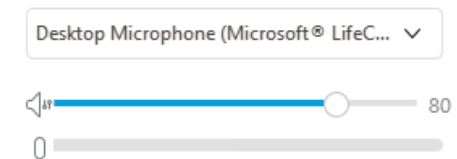

Set the Microphone to the Plantronics headset also, and tap on the mic to test it.

Use the sliders to adjust the speaker volume and mic sensitivity. Moving the sliders to the right will increase the corresponding levels.

Speaker

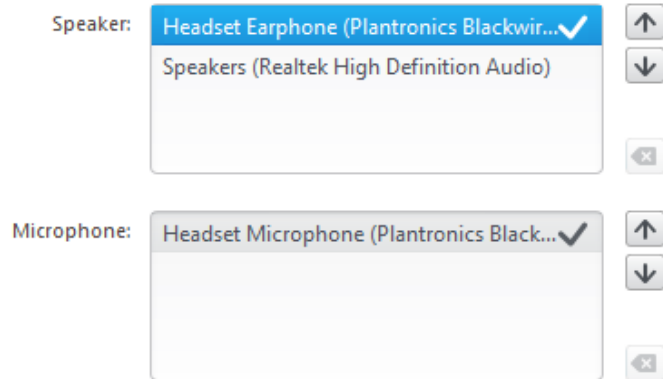

Microphone

Jabber 12.6 Quick Reference

Headset Priority

To ensure the headset always takes priority over your computer's built in speaker/mic click on Advanced while in the Audio tab then use the arrow buttons to move the headset to the top of the list for both Speaker and Microphone. Click Apply when finished.

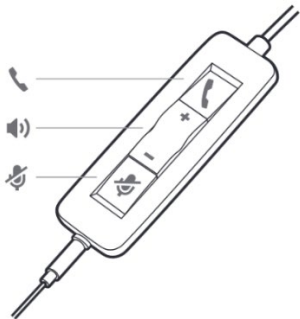

Headset Controls

The Plantronics headset contains the following physical buttons:

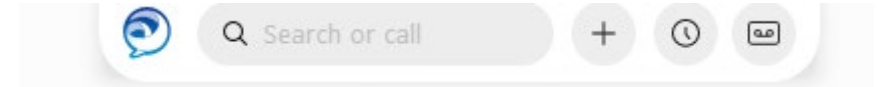

Call: Flashing green indicates an incoming call, press to pick up. Solid green indicates an ongoing call. Press to hang up.

Volume +/-: To control the volume levels.

Mute: Press to mute/unmute. When it is solid red the mic is muted.

Jabber Dock

The Jabber dock contains basic functions and shortcuts to the main Jabber tabs. It can be repositioned along the top of your screen by clicking and dragging the lower part.

To hide the dock:

1. From the Jabber hub window click on Menu
2. Point to View, then remove the checkmark beside Show docked window.
