

UNITY VOICE MAIL INITIALIZATION

START UP CHECK LIST [For Cisco IP Phone Users]

Your first step in using Cisco Unity Connection Voice Mail is to initialize your mailbox. Step #1 is only done once.

1. INITIALIZING THE NEW MAIL BOX;

- From your desk using Cisco IP Phone press the message button at the prompt, enter the temporary **PIN [Password]**, which is **12345**
- Listen carefully, and respond as prompted. You do not need to refer to any connection documentation during initialization. The system will tell you when the enrolment process is complete.

You will have to;

- At the prompt **record your name [e.g. John Smith]**
- At the prompt **record a greeting** that will play to callers
- At the prompt change your phone **PIN [Password]**[**Minimum of 4 digits, maximum of 15**]

✚ If you hang up before you have completely initialized, the first-time enrolment conversation plays again the next time you log on.

2. ACCESSING YOUR MAIL BOX AFTER INITIALIZATION

From Your Desk;

- Press the message button
- Enter your **PIN [Password]** followed by **[#]** - for you it would be **[12345][#]**
- From someone else's desk [who has a Cisco IP Phone]
- Press the message button
- Enter your **ID [your 5 digit Extension number]** followed by **[#]**
- Enter your **PIN [Password]** followed by **[#]**
-

From Someone Else's Desk [**who has a Centrex Phone**];

- Dial the Cisco Access Number **[85000]**
- Press **[*]**
- Enter *your* **ID [your 5 digit Extension number]**
- Enter your **PIN [Password]** followed by **[#]**
- From Outside of our telephone system
- Dial the *entire* access number **416-338-5000**
- Press **[*]**
- Enter *your* **ID [your 5 digit Extension number]**
- Enter your **PIN [Password]** followed by **[#]**
